

Improve outcomes with Elation's Care Gaps APIs

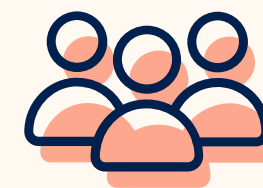

Empower your primary care organization with value-based care capabilities

Meet and exceed your value-based, risk arrangement performance goals

Achieve care quality goals and effectively manage costs

Focus your care teams on the highest leverage activities to improve outcomes

Easy implementation lets the care team quickly adopt and utilize the new capabilities

How it works

Actionable Reminders

Customize in-app decision support to provide evidence-based clinical reminders.

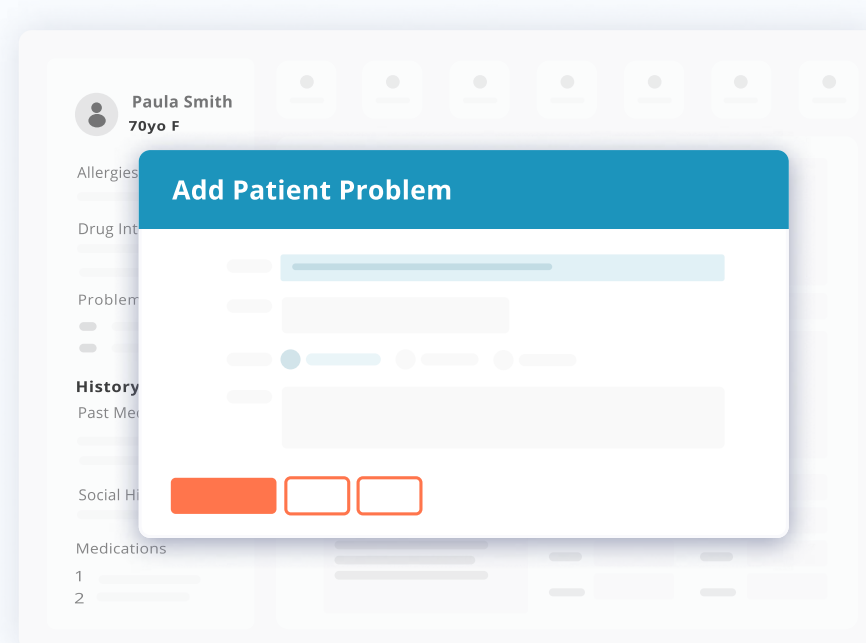

Custom eCQMs

Import custom care gaps via flat file or API to display at the point of care.

Differentiate Preferred Referrals

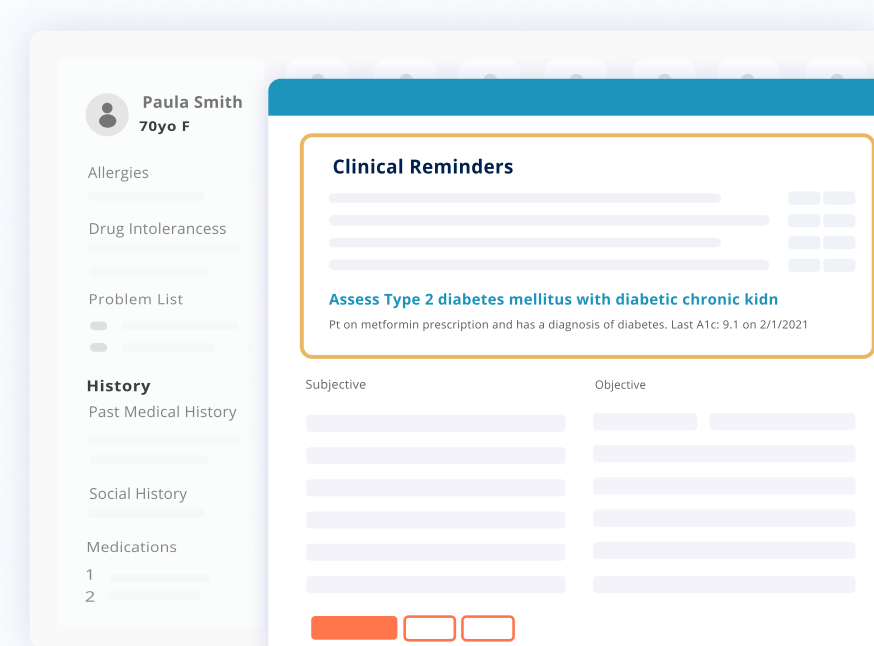

Distinguish between preferred referrals within our EHR with our network steerage capabilities

Everyday use cases powered by Elation's Care Gaps APIs

Assess Chronic Conditions

Highlight patient risk scores and opportunities to reassess chronic conditions at the point of care. Enable automatic documentation and coding with one click to improve care and save time.

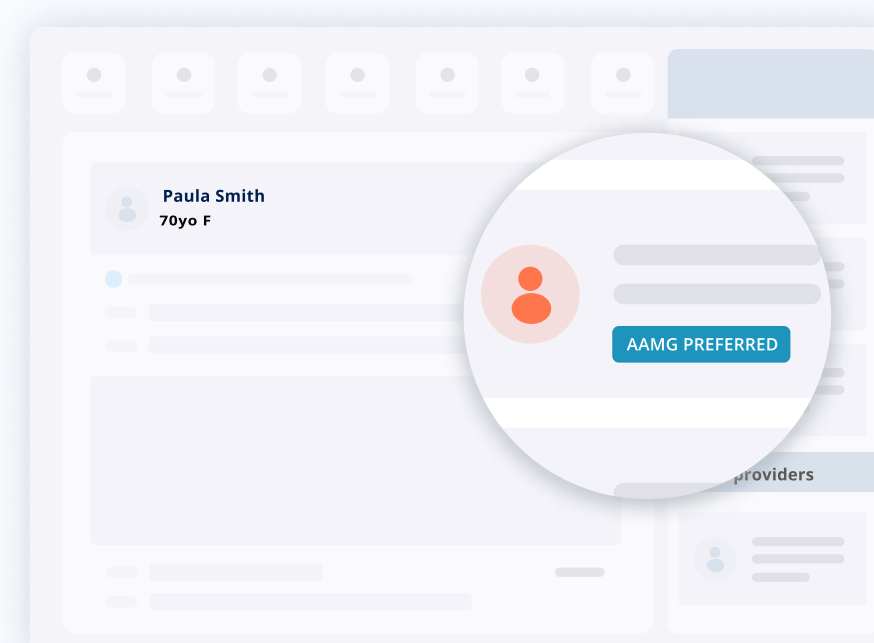

Identify suspect conditions

New suspect conditions appear in the context of the provider's visit note workflow. Provide more context on the underlying source data to inform providers' clinical decision-making and assessment.

Report on Outcomes

Measure your risk recapture rate and care gaps closure rate, increasing what you can track and deliver through Elation's EHR.

Network steerage

Include preferred providers in the workflow to drive in-network referrals and care delivery, resulting in high-quality, low-cost care.
