Clinical-First EHR and Managed Billing Services

Powered by MDinTouch

Seamless clinical and financial workflows from pre-visit bill resolution

A unified healthcare payment solution you can trust to improve clinical and financial outcomes while reducing administrative burden.

A unified healthcare solution

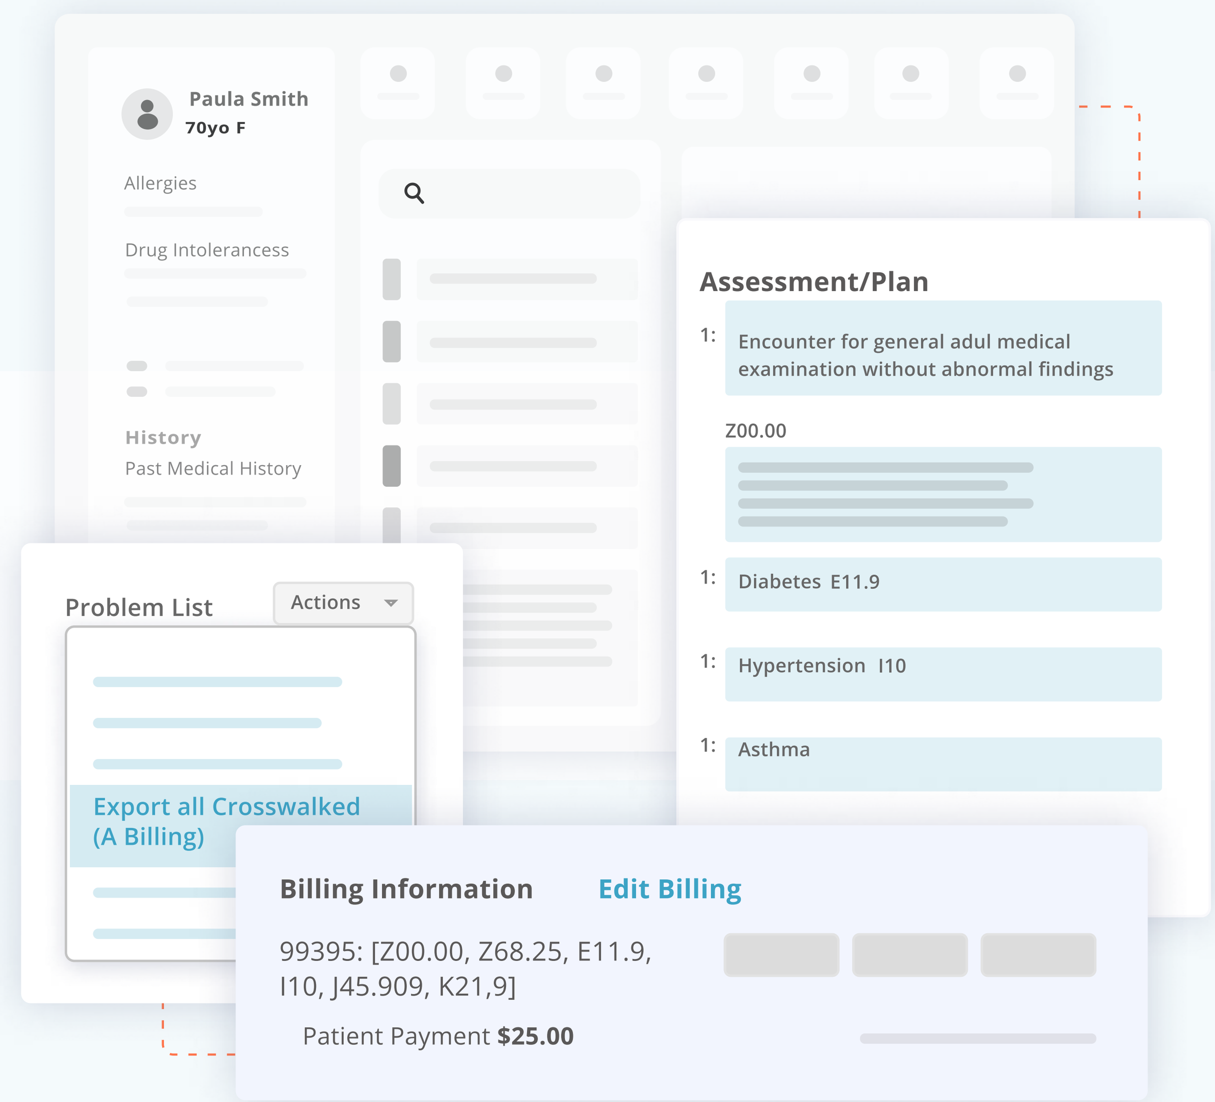
Unified clinical EHR documentation, clinical connectivity, and medical billing workflows give you the freedom to focus on delivering phenomenal patient care instead of billing compliance and oversight.

Automated workflows to maximize revenue

Front-office, clinical, and financial workflows that reduce manual billing intervention, and prevent denials before they happen.

Improved clinical and financial patient experience

Streamline visits to enhance the patient experience with self-scheduling, text and email reminders, online patient payments, digital intake forms, personalized statements, and more.



Turnkey managed billing services you can trust

- Real-time eligibility
- Insurance credentialing
- Revenue cycle services
- Electronic + paper statements
- Implementation + support
- Inbound patient call center

Accelerated cash flow	Peace of mind	Flexibility and support
Pre-visit real-time eligibility and pre-claim edit checks boost first-pass clean claim rates to help you get paid more, faster.	Feel confident billing is compliant, revenue is maximized, and financial insight is transparent.	The freedom and flexibility to get paid your way, with a proven primary care managed billing team ready to help.

Patient-centered healthcare from pre-visit to bill resolution

Before the visit

- Empower patients to manage care with in-person and virtual appointment self-scheduling
- Engage patients with automated reminders and notifications, pre-visit payment collection
- Collect accurate clinical and financial information before the visit with electronic intake forms
- Prevent denials with automated pre-visit insurance and benefit coverage eligibility

During the visit

- Seamless, one-click in-chart virtual care workflow - no login or app download
- Intuitive charting, ePrescribing, eOrders, templated notes, clinical reminders, and referrals

After the visit

- Pre-claim edit checks and clearinghouse claim submission
- Electronic + paper statements, inbound patient call center, patient payment posting
- Claim tracking + follow-up, rejection + denial rebilling, and ERA/EOB payment posting
